

Lesson 3.7: Managed and Unmanaged Tables

DISTRIBUTED COMPUTING WITH SPARK SQL

Managed and Unmanaged Tables

Conor Murphy
Data Scientist
Databricks

UC DAVIS
Continuing and Professional Education

Slide 2: Welcome Back!

Welcome Back!

Spark is a compute engine and does not store data

Data on the Spark cluster disappears upon termination, unless it is saved elsewhere

Examine managed and unmanaged tables

Slide 3: Learning Objectives

Learning Objectives

Write both managed and unmanaged tables

Explore the behavior of dropping tables on the underlying data
